## KEY OBJECTIVES

The Fund's investment objective is to offer a yield pickup by investing primarily in USD-denominated Sharia Compliant Sukuk with a pre-determined yield at the time of investment over a four (4) year period.

## \* IMPORTANT NOTICE

Key Information and Key Objectives are targets, not guarantees. The Targeted Distribution of 5.0% and the Target Quarterly Payouts of 1.25% per quarter are targets based on the prevailing yields at the time of constructing the portfolio. Yields and the distribution may rise or fall during the life of the product depending on market movements and portfolio management of the underlying bonds.

Target Payout Calendar is indicative. The first quarterly distribution in July 2019 is based on 2 months' coupon accumulation. The final quarterly distribution is based on two months' coupon accumulation. Principal is expected to be repaid in full at maturity but can be lower or higher due to market and/or credit-related events. Principal can vary due to profit and loss, realized or unrealized gains, whether or not net of realized or unrealized losses, any coupons or distributions received from the underlying bonds, interest earned, any other cash receipts and capital.

## Monthly Comment

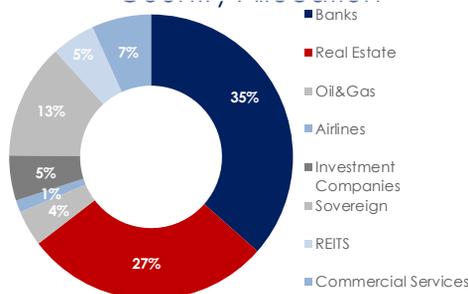

After trading with a very strong tone for most of February, the global Sukuk asset class rapidly reversed the course at the end of the month. The widening scope of Covid-19 virus caused a sharp selloff in global equity and credit markets and drove US government bond yields to record lows as investors chased safe heaven assets.

Middle Eastern sukuk bonds were further adversely impacted by lower oil prices which was another consequence of the Covid-19. In addition, escalation in Turkey/Syria war and negative headlines surrounding some Sukuk issuers also weighed heavily on the asset class. Specifically, DP World's decision to delist, possibility of fraud at NMC and likely restructuring of Garuda's outstanding Sukuk caused a decline in the bond prices of these three issuers with Garuda and NMC bonds experiencing a particularly steep fall steep fall.

Given the attractive relative valuation and strong fundamentals of most of the issuers in the global Sukuk asset class, we continue to be optimistic about the long-term risk/reward characteristics of the global Sukuk asset class. In the near term however, we prefer to be cautious until we start to get clarity on the economic impact of Covid-19 virus. We expect global central banks to provide ample liquidity in response to Covid-19 crises. As a result, we expect markets to stabilise as we get more clarity on economic disruption caused by the outbreak.

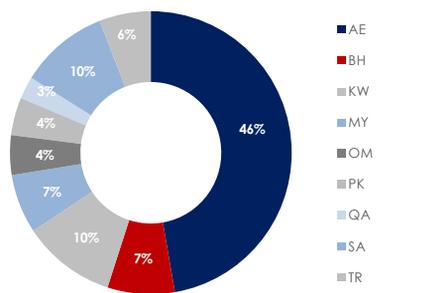

The portfolio remains reasonably diversified, with a BB+ rating. In February the above mentioned events had a -0.27% impact on the portfolio, which remains up by +1.2% on YTD and +6.3% since inception.
